To

P.G. D'Souza Esq., B.A., B.L.,

Secretary to the Govt. of H. H. the Maharaja of Mysore,
Education and Agriculture *Department.*

Sir,

With reference to correspondence ending with my letter No.4558/165 dated the 17th August 1916, I have the honour to forward copy of a cablegram dated the 24th instant received from Mr. R. Sitarama Rao, Mysore Government scholar, learning Paper Manufature in America, praying for an extension of the period of scholarship granted to him in Government Order No.4787-93/Edn.2-14-157 dated the 12th May 1915 and subsequently extended by another year in Government Order No.267-8/Edn. 2-15-145 dated the 8th July 1916. Under the circumstances stated in para 3 of letter dated the 29th June 1916 (copy of which was forwarded with my letter of the 17th August 1916, quoted above, and extract from which is herewith forwarded for ready reference) from the Director of Pulp and Paper School, University of Maine, Orono, Mr. Sitarama Rao has to undergo practical training for a year in a large paper manufactory and study the mechanical side of the manufacture. Also, in accordance with the instructions issued by Government (vide letter No.739/Edn.2-15-19 dated 14th July 1915) that the scholar must study in such a manner as to be able to manage the business of a Paper Mill from start to finish, it is desirable that Mr. Sitarama Rao should be allowed to continue his studies in America for a year more. I therefore recommend that

that the period of scholarship may again be extended by another year and request that early orders may be passed in the matter. I may add that the period of the scholarship now granted for two years expires at the end of August next.

I have the honour to be,

Sir,

Your most obedient servant,

T. Sharma Rao,

Inspector General.

Extract from letter dated 29th June 1916 from the Director of Pulp and Paper School, University of Main, Orono, Maine,U.S.A., to the Inspector General of Education in Mysore.

"In order to round out his training in the pulp and paper industry, it seems best, after making this special study on the bamboo, for him to make an extended trip to study to get in close contact with the various phases of the industry. He should study the machinery of paper making on a large scale in the factories where they are made; he should go into the pulp mills and into the paper mills and into the reclamation mills and get first hand knowledge as to these industrial operations on a large scale. In order to accomplish this, we feel that a third year should be spent in this way, and the expenses incurred by such a trip would probably amount ϕ to 100 pounds above the stipend which he has been receiving"

"I recommend, therefore, that for the year beginning July, 1917, that he receive a stipend of 300 pounds. This will enable him to return to India fully equipped to take up the industrial work in pulp and paper from most any standpoint.
